**EBARA Technologies, Inc. announces  
New Payment Methods for 2006**

**Sacramento, CA, Dec. 16, 2005 –**

In a move to accommodate customer needs and streamline purchasing, Ebara Technologies has incorporated several new payment options for 2006. Ebara Technologies, Inc. now accepts PayPal payments from customers, expanding on the forms of payment options currently available. Purchases can now be funded through PayPal allowing customers to pay in the way that they prefer, whether it is using a credit card, debit card, bank account, or stored balance. Ebara customers will now be able to make quick, easy, and secure payments by means of phone, fax, and email. Ebara is confident that the move to PayPal services will provide many benefits for current and potential customers reducing payment complexities. PayPal has a global network of more than 56 countries and regions with over 86 million account members worldwide. PayPal utilizes the world's most advanced proprietary fraud prevention systems to create a safe, global, real-time payment solution. The new payment move has been employed after an expanding product line into smaller vacuum components created a demand for simplified purchasing on lower priced orders. The new Ebara payment system will be extremely beneficial for small to medium sized businesses looking to make low money purchases with quicker turn around times.

**About EBARA Technologies, Inc.:**

EBARA Technologies, Inc. is a U.S. based subsidiary of EBARA Corporation, a Japanese company founded in 1912, which provides a wide range of technologies including equipment, systems and services for water, air and the environment. EBARA Technologies, Inc. is a leading global innovator and worldwide supplier of vacuum technologies and advanced wafer-processing equipment for clean environments within the semiconductor industry. EBARA manufactures a full line of Dry Mechanical Pumps, Mag-lev Turbo and Hybrid Turbo molecular Drag Pumps for the semiconductor industry's toughest applications, including LPCVD, etch, EPI and Ion Implant. The company's offerings also include a complete line of Vacuum Valves and Fittings, Heaters for vacuum and exhaust lines, Point-of-Use Abatement systems, Wafer carrier and storage units, Airborne Molecular Contamination filters, Ozonized water and gas equipment. Our systems group manufactures Chemical Mechanical Polishers (CMP). EBARA Chemical Plating Systems (ECP), and Through-Mask Plating Systems (ThMP). EBARA maintains a superior sales and support network in the U.S. and worldwide. Additional information about EBARA Technologies, Inc. can be found at [www.ebaratech.com](http://www.ebaratech.com).
