

Sacramento, California - September 22, 2005. EBARA Technologies, Inc. a leading manufacturer in the semiconductor industry for dry pumps, vacuum components and services is proud to announce the addition of four new staff members as part of the Components Sales team.

Mike Chambers joins as an **Account Manager** covering the Central U.S. Region, bringing with him more than 24 years of semiconductor industry experience. Mike spent 12 years with Motorola and Advanced Micro Devices as an Equipment Engineer and then as an Engineering Manager. Mike was the Start-Up Team Manager for Motorola MOS-8 and AMD Fab-15. In addition, Mike spent over 12 years with Tegal Corporation, Steag MicroTech, and Mattson Technology. Mike has held several key positions at these companies including Enhancement Development Manager, Central Region Manager and Global Account Manager. Prior to joining Ebara Technologies Mike was at AMD as the Global Account Manager for Mattson Technologies.

Jameel Mussa, a recent graduate from the University of California at Santa Barbara comes to Ebara Technologies as an **Inside Sales Representative** working out of Sacramento, California. Jameel interned at the Lawrence Berkeley National Laboratories for three summers where he undertook several projects from software engineering to beam-line end station maintenance. Jameel has engineered software for ion gauge controllers, beam-line servomotors, and a thin film deposition controller. Jameel also has taken the Vacuum Technology Fundamentals course offered by the American Vacuum Society.

About EBARA Technologies, Inc.

EBARA Technologies, Inc. is a U.S. based subsidiary of EBARA Corporation, a Japanese company founded in 1912, which provides a wide range of technologies including equipment, systems and services for water, air and the environment. EBARA Technologies, Inc. is a leading global innovator and worldwide supplier of vacuum technologies and advanced wafer-processing equipment for clean environments within the semiconductor industry. EBARA manufactures a full line of Dry Mechanical Pumps, Mag-lev Turbo and Hybrid Turbomolecular Drag Pumps for the semiconductor industry's toughest applications, including LPCVD, etch, EPI and Ion Implant. The company's offerings also include a complete line of Vacuum Valves and Fittings, Heaters for vacuum and exhaust lines, Point-of-Use Abatement systems, Wafer carrier and storage units, Airborne Molecular Contamination filters, Ozonized water and gas equipment. Our systems group manufactures Chemical Mechanical Polishers (CMP), EBARA Chemical Plating Systems (ECP), and Through-Mask Plating Systems (ThMP). EBARA maintains a superior sales and support network in the U.S. and worldwide. www.ebaratech.com
