## Come See Us at SEMICON West 2018

SEMICON West is the one place where the new, interdependent supply chain comes together and the reimagined industry comes into focus.

Increased involvement of systems integrators, massive industry consolidation, new device types, process and materials changes and a myriad of other developments are profoundly reshaping the competitive landscape.

Ebara will be exhibiting one of our latest dry pump technologies; a fully configured customizable advanced integrated pump rack solution including our EV-M, EV-S, EV-A series pumps, forelines, exhaust lines and line heaters. These integrated systems enable users single POC for all utilities, seismic stability, support for forelines, exhaust lines, valves and optional heaters. This modularity allows additional capacity to be added at order placement or in the future.

**SEMICON<sup>®</sup>WEST**  
**BEYOND SMART**

Contact us to schedule a meeting with one of our Components or Systems Equipment Division representatives. We have conference rooms available at the Marriot Marquis and onsite availability in our booth meeting room during exhibition hours.

**Join us to see our new booth design and various products on display!**

### Exhibit Booth Hours:

**Tuesday, July 10: 10:00am-5:00pm**

**Wednesday, July 11: 10:00am-5:00pm**

**Thursday, July 12: 10:00am-4:00pm**

For events and activity updates please visit our social media platforms:

**Ebara will be closed  
July 4th & 5th  
for the Holiday**

# ESSENTIALS Elements

## Introducing the Ebara Nitrogen Box Heater

Ebara Technologies, Inc. provides quality maintenance for pump operation throughout various applications and has created an innovative, fast response heater designed to heat Nitrogen gas to temperatures of up to 200°C.

For user convenience, this 120V heater is also designed to be "Plug and Play," and works in tandem with the Ebara 7" touchscreen HMI. This association allows the user to adjust, set and monitor their desired temperature parameters. Most LPCVD, Metal Etch, CVD, PECVD, FPD, and ALD users can all benefit from heated dilution solutions to reduce undesirable temperature reactions during process.

Contact your local Ebara representative or email [info@ebaratech.com](mailto:info@ebaratech.com) for more information.

## SVC TechCon Exhibition

Proud Gold Corporate Sponsor at the recent Society of Vacuum Coaters (SVC) Technical Conference (TechCon) held in Orlando, Florida. For the past 60 years, the Society of Vacuum Coaters has delivered stimulating content, mixing basic and applied research along with ideas and tools focusing on transitioning research and development results into production. Each year adds new insights into the latest trends and state-of-the-art developments in the dynamic field of vacuum coating technologies.

Save the date for next year's Technology Exhibit in Long Beach, CA.  
April 30th - May 1st - To register or learn more visit:
