EBARA Technologies Inc. Enhances Service Offerings with Eco3d

Sacramento, California – October 10, 2018. EBARA Technologies, Inc., a leading manufacturer in the semiconductor industry for dry pumps, vacuum components and related services is proud a new partnership with Eco3D.

Ken Smerz, President and CEO states “Eco3d’s scanning technology offers a process to scan and digitize our clients’ world (facility, clean room, chase or sub fab) enabling the end-user to take and use three dimensional measurements versus conventional 2-d as-built comparisons”. This service allows clients to enhance safety, enable Virtual Design & Construction (VDC) initiatives, reduce labor and materials expense, compress project schedules and have a highly accurate QA/QC process.

This technology focuses on 3d measurement with the fastest available technology and proprietary stitching software can be used an integral part of the planning process for building/clean room modeling, clash detection, tool relocation, expansion or renovation projects.

About EBARA Technologies, Inc.

EBARA Technologies, Inc. is a U.S. based subsidiary of EBARA Corporation, a Japanese company founded in 1912, which provides a wide range of technologies including equipment, systems and services for water, air and the environment. EBARA Technologies, Inc. is a leading global innovator and worldwide supplier of vacuum technologies and advanced wafer-processing equipment for clean environments within the semiconductor industry. EBARA manufactures a full line of Dry Mechanical Pumps, Turbomolecular Pumps for the semiconductor industry’s toughest applications, including LPCVD, etch, EPI and Ion Implant. The company’s offerings also include a complete line of Vacuum Valves and Fittings, Heaters for vacuum and exhaust lines, Point-of-Use Abatement systems, Ozonized water and gas equipment. Our systems group manufactures Chemical Mechanical Polishers (CMP), EBARA Chemical Plating Systems (ECP), and Through-Mask Plating Systems (ThMP). EBARA maintains a superior sales and support network in the U.S. and worldwide. www.ebaratech.com

About Eco3d

Eco3d is the largest stand-alone service provider of its kind in the country, with expertise in more than ten vertical markets, with rapid growth nationally and internationally, in 2d and 3d documentation. Eco3d works on custom projects integrating the latest technologies in industries including: construction, process plants, healthcare, retail, real estate, civil, and forensic investigation.

The company measures existing topographic, structural, mechanical, and architectural conditions using a variety of instruments, and then creates highly accurate computerized documentation of these conditions in 2d and 3d replications. This information is used for renovation, construction, and documentation to save money and assist in risk mitigation.
