

EBARA

Modular Installation System

Ebara's two-level, modular pump rack system is the perfect solution for areas with space constraints. These flexible designs can accommodate different sizes of pumps and save you valuable floor space.

Features

- Modular, add or remove sections with ease
- Seismic hold downs available for individual pumps
- Designed to accommodate utility connections
- Suitable for right or left installation
- Pan rack design to hold different size pump (top level)

Benefits

- Maximize valuable sub-fab space
- Easy to install
- Simplify connection points
- Utilize vertical space and maximum available footprint
- Easy to expand as needs change
